

Search #937 Chief Steam/Lead Plant Operator

The Organization

Our client is a Calgary-based private company focused on the development of its core energy assets. These assets are long reserve life, and natural gas weighted in the Western Canadian Sedimentary Basin. Their E&P business produces over 50,000 boe/day from predominantly operated wells, infrastructure and facilities. The key corporate priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, and in this case, generating value from midstream assets and investing for growth and value.

Why Consider This Role?

- You are part of the **decision-making** process at the plant. The visibility of your initiative and leadership provides for personal & professional upside.
- The company focuses on strategic objectives while creating long-term value.
- Depending on your career plan, you can impact your future in many ways.
- Our client plans for steady, stable growth. They have successfully weathered the downturn and can manage low prices economically.

Team Dynamics

As a member of a multidisciplinary team, the **Lead Plant Operator** will report to the **Superintendent** and will work directly with the operators, accounting, engineering, land, EH&S and management. You will have fulltime and contract staff, so communication and trust is critical.

Activities and Responsibilities

As a member of plant operations team, you are the point in business and financial analysis with the following responsibilities;

- Take direction on projects from the Superintendent and occasionally head office.
- Lead the Plant operations group managing the day to day business with safety being key priority.
- Maintain processing reliability and product quality while optimizing production volumes safely
- Ensure equipment is prepared for maintenance in a safe and efficient manner
- Provide Chief Steam duties as outlined by ABSA, fulfill Relief Plant Superintendent duties.
- Optimize equipment and process
- Participate in projects and turnarounds
- Mentor and train junior operators
- Monitor equipment and process parameters
- Enter compliance reports and near misses or events as required
- Maintain housekeeping standards
- Assess, develop, and maintain operating procedures
- Demonstrate, uphold all corporate rules, guidelines, policies & procedures applicable
- Live within 45 minutes of Rocky Mountain House, AB

Experience

Your education will be a minimum of a high school diploma, certified in H₂S Alive, First Aid, WHIMIS, TDG, and include third class power engineering. A 2nd class ticket is preferred. You have 15+ years of progressive experience gained in NGL fractionation and Lean Oil Absorption in the WCSB. You have initiated well thought out ideas resulting in a track record of value and trust in your work. You possess an energetic style, an attention to detail, lead by example and have a desire to get down to work. You will also be able to motivate your staff and teammates to produce results within tight timeframes and manage competing deadline requirements for your time.
