

Search #971 Abandonment Superintendent Engineer, Contract

The Organization

Our client is a Calgary-based private service company active in the Western Canadian Sedimentary Basin. The business supports their clients regulatory required well abandonment programs from planning to execution. Due to continued growth and success, they require a Contract Superintendent.

Why Consider This Role?

- This is an excellent opportunity to work for a growing, entrepreneurial Canadian company.
- Diversity in work and projects provides you with skill development as well as applying your well – rounded experience in problem-solving.
- With the impact you can have, this is a long -term opportunity for the right person.

Team Dynamics

As a member of the Abandonment Team, you will report to the Director, Abandonment, work with internal staff and external consultants and clients in the field.

Activities and Responsibilities

The successful candidate will be accountable for:

- Daily communication with wellsite supervisors.
- Daily report and cost review. Advise on cost-cutting initiatives.
- Nightly operations update to clients.
- Attending daily morning in-person operations meetings.
- Reviewing wellfiles and preparing programs.
- Maintain strong communication with regulatory agencies.
- HSE, the health and safety of all individuals is not taken for granted. Safety – being proactive, plan accordingly. Incident reporting, near misses, Hazard ID's. Ensuring it is part of daily routine. Assessing the field staff to enhance their safety knowledge, hold meetings where possible and review contractor's certification.
- Field visits (pending field activity levels this might be an extra charge),
- Log reviews / recommendations as required.
- Invoice approval. Invoicing / Salesforce work – work with accounting as required to sort out invoicing problems.
- Inventory tracking (work strings), condition of equipment.
- Liaise with clients as required – weekly cost and activity reporting.
- When required, work closely with other team members to help solve technically challenging issues.
- 'Soft marketing.' Recognizing additional work/projects with current clients and advising the Director or other internal management.

Experience

- Member in good standing of provincial engineering associations (APEGA, APEGS, EGBC) University degree in Engineering, and greater than 10 years of progressive relevant Oil & Gas experience.
- Downhole experience in production and completions across several formations and well types.
- Robust communication skills and ability to work effectively in a fast-paced, cross functional team to develop and maintain collaborative working relationships.

- Self-starter with strong analytical, problem solving and organizational skills.
- Microsoft Office, particularly Excel is required. Hands on experience of GeoScout and other well file software is required.
- Strong written and oral communication skills. Interact with management and department heads.
- Ability to analyze solutions and make recommendations to management.
