

Search #983 President

The Organization

Our client is a Calgary-based full-service downhole abandonment company providing corporate liability assessments, abandonment programming, project management of client abandonment programs, regulatory submissions and wellsite supervision. Working closely with their clients, their service offering identifies opportunities to streamline workflow, incorporate innovative cost saving strategies and creates economies of scale to deliver safe, cost-effective and regulatory compliant closure activities.

Why Consider This Role?

- This is an excellent opportunity to work for a growing, entrepreneurial private Canadian company.
- As a hands – on leader, you are active and engaged in managing and developing an established, well – funding energy services company.
- With the impact you can have, there is personal and professional growth.
- Client relationships and developing the business will benefit you and the company.

Team Dynamics

You report to the Chairman, lead the technical, accounting and operations staff. The clients are also considered part of the Team. Maintaining relationships to grow the company is also important.

Responsibilities:

- Provide immediate and long-term strategic direction and leadership to grow the company.
- Understand and lead the company through an evolving oil and gas / downhole abandonment industry, including market trends, competitive landscape and regulatory requirements.
- Lead the marketing, budgeting and financial planning efforts to ensure the company meets revenue and profitability targets, while exploring growth opportunities.
- Guide and develop the team to provide “best in class” abandonment services.
- Foster a positive work environment and promote the company’s values and mission while delivering exceptional service to clients.

Qualifications:

- Demonstrated track record of growth and management in a downhole oilfield service company.
- University degree in engineering is required and member in good standing of provincial engineering associations (APEGA, EGBC).
- 20+ years of progressive relevant oil & gas experience.
- Downhole experience in production and completions across several formations and well types.
- Robust communication skills and ability to work effectively in a fast-paced, cross functional team to develop and maintain collaborative working relationships.
- Self-starter with strong analytical, problem solving and organizational skills, coupled with an entrepreneurial drive.
- Microsoft Office, particularly Excel is required. Hands on experience of GeoScout and other well file software is required.
- Strong written and oral communication skills. Interact with partners, clients and staff.
- Ability to analyze solutions and make recommendations to staff and clients.
