

Search #984 Completions Engineer

The Organization

Our client is a Calgary-based private oil and gas company, with their core areas W4 & W5. Their growth has been a steady combination of development and acquisitions relying on the strength of their staff. Their current production of light and medium oil is over 24,000 boe/d.

Why Consider This Role?

- This is an excellent opportunity to work for a growing, entrepreneurial private dividend – paying Canadian company.
- You are active and engaged in delivering key services to the company.
- With the impact you can have, there is personal and professional growth.
- You see first-hand how an energy company works.

Team Dynamics

You report to the Completions Manager, work with engineering, accounting and operations staff.

Responsibilities:

- Independently plan, design and execute completions and workover activities. Work to provide “best in class” completions services.
- Foster a positive work environment and promote the company’s values.
- Control, review and implement all aspects of a program including, cost, design (fluid, proppant, pump), safety and field staff communication.
- Project reviews for continuous improvement initiatives, cost savings and execution.
- Budget planning and input.
- Collection and analysis of well and execution data for enhancing performance.
- Regulatory compliance with AER and other stakeholders.
- Manage multiple projects, visits and communication.

Qualifications:

- Demonstrated track record of growth in downhole completions, recompletions and workovers.
- University degree in engineering is required and member in good standing with APEGA.
- 5-10 years of progressive relevant oil & gas experience.
- Downhole experience in production and completions across several formations and well types.
- Robust communication skills and ability to work effectively in a fast-paced, cross functional team to develop and maintain collaborative working relationships.
- Self-starter with strong analytical, problem solving and organizational skills, coupled with an entrepreneurial drive.
- Microsoft Office, particularly Excel is required. Hands on experience using Accumap or similar software is required.
- Strong written and oral communication skills. Interact with daily with field and office staff.
- Intellectual curiosity to analyze problems, find solutions and make recommendations.
